

RHIZOMES

EFFI BRIEST

Rhizomes is the debut full length from the all-female outfit, **EFFI BRIEST**. The nine song opus *Rhizomes* unleashes a propulsive beat that drives angular guitars and bone chilling vocals over dark bass, dense drones and clattering dance-like percussion. The atmospheric psychedelica owes as much to **Arthur Russell** as **Amon Duul**.

Rhizomes includes two of the band's UK singles on **Loog Records** and seven more previously un-released original songs. There are brilliant videos for both singles; the cinematic "Long Shadow" directed by **Brandon LaGanke** is making its way around the internet and showcases the six-piece during their most formidable hour. And **Mak Kern's** stunning animation for effi briest's palindrome song "Mirror Rim" is bound to boomerang back if you missed it the first time. Coming soon is a split with **Peaches** on **Blast First Petite** as part of the label's ongoing 12-inch tribute series to **Suicide**.
